Professional Summary

Computer Science graduate with hands-on experience in data analysis, healthcare analytics, and business intelligence projects. Skilled in SQL, Excel, Power BI, data validation, KPI reporting, and dashboard development. Experienced through practical projects in analyzing healthcare operational and revenue data to identify performance patterns and potential improvement opportunities. Seeking an entry-level Data Analyst or BI role.

Education

BSc in Computer Science, *Modern Academy* 2022 – 2026 | Cairo, Egypt

- Grade: Very good
- Graduation project: A+

Experience

Coding instructor, *iSchool Part-time* 07/2026 – 09/2026

- Delivered 30+ programming and technology sessions to 60+ students across 6 cohorts.
- Explained technical concepts through hands-on exercises and project-based learning.
- Guided student teams through programming projects, supporting problem-solving and practical application of technical concepts.

Data Analyst Trainee, *DEPI* 07/2025 – 12/2025

- Applied SQL, Python, Power BI, and Tableau in hands-on data analytics projects covering data cleaning, validation, transformation, and visualization.
- Analyzed healthcare datasets covering clinics, doctors, patients, and revenue to identify performance patterns and potential revenue improvement opportunities.
- Built interactive Power BI reports using Power Query, DAX, and data modeling to monitor KPIs and communicate analytical findings.

Projects

Customer360 Analytics & Automation Platform, *Databricks | PySpark | SQL | Power BI | n8n*

- Integrated 5 data sources into a unified Customer 360 data model using Databricks, PySpark, and SQL, organized into 3 fact tables and 4 dimension tables.
- Cleaned and validated 300K+ order records, identifying 1,734 duplicate customer IDs and 1,040 missing email addresses.
- Applied validation checks that flagged 11,163 orders for customer-related data issues; documented the checks to support investigation and data quality improvement.
- Automated daily data quality checks across 7 Gold-layer tables covering 884K+ records using n8n, with issue classification and audit logging in Google Sheets.
- Built Power BI dashboards to monitor customer, order, and support KPIs, and developed 4 data-driven recommendations with a 90-day action plan.

Uber Business Intelligence Report, *SQL | Business Analysis | KPI Reporting*

- Analyzed 20,000 trip records across 4 cities using SQL to evaluate revenue, cancellations, surge pricing, rider behavior, and driver performance.
- Identified a 14.8% cancellation rate and analyzed revenue concentration, finding that 22% of riders accounted for 75% of total revenue.
- Investigated potential revenue leakage estimated at $106K and developed 4 business recommendations covering rider retention, surge-zone coverage, wait times, and driver allocation.
- Estimated a potential annual revenue opportunity of $40K–$60K based on project assumptions and proposed improvement scenarios.

Telecom Customer Churn Analysis, *SQL | Power BI | Data Cleaning*

- Cleaned and analyzed 15,000+ customer records using SQL and Power BI to investigate churn patterns across contract type, payment method, geography, and usage behavior.
- Conducted exploratory analysis and data validation to identify churn patterns and gaps in churn-reason data.
- Developed retention recommendations, including targeted outreach, flexible plans, and personalized offers for potentially high-risk customer segments.

Football Scouting System — Graduation Project, *Python | Power BI | Excel | Machine Learning*

- Aggregated and standardized 4,000+ football player records across 5 seasons to support a machine learning-based scouting pipeline.
- Developed 20+ football performance KPIs and built 3 interactive Power BI dashboards for player analysis and comparison.
- Extended the analysis to 195+ countries across 10 global indicators, enabling interactive geographic exploration.

Technical Skills

SQL & Data Analysis: SQL, Data Cleaning, Data Validation, Exploratory Data Analysis (EDA), KPI Analysis
BI & Visualization: Power BI, DAX, Power Query, Data Modeling, Dashboard Development, Tableau
Excel: PivotTables, XLOOKUP/VLOOKUP, Data Cleaning, Reporting
Python: Pandas, NumPy, Matplotlib, Scikit-learn
Data Engineering & Automation: Databricks, PySpark, Delta Lake, ETL Pipelines, n8n
Python: Pandas, NumPy, Matplotlib, Scikit-learn
Tools: Git, GitHub, Jupyter Notebook, VS Code

Courses & Certifications

DataCamp, ***SQL Analyst Track***

DataCamp, ***Power BI Analyst Track***

Training & Professional Development

- **Machine Learning Training — IT Shark**
- **AI for Data Analysis — Orange Digital Center / Digital Hub**
- **Data Analysis Training — Digitera / EraaSoft**
- **Tech for Non-Techies — ICareer**
